TECHMARK CORPORATION

SERVICE WITH QUALITY IS OUR PRIORITY

TECHMARK CORPORATION

MISSION

To Provide the best to our valuable customers by being a reliable supplier delivering

VISION

To be one of the best and most respected company in our field where all our suppliers, clients and staffs would be satisfied.

To earn the trust of our valued customers by preserving the quality and consistency at every phase.

TEAM

Our organisation is is bucket by a team of expert who have strived from years to offer the best product and services to our clients. it is their hard work and sincere dedication that take TECHMARK CORPORATION has become leading hydraulic and industrial hose assembly company in CENTRAL INDIA.

TECHMARK CORPORATION

COMPANY OVERVIEW

With an Extensive experience of over 20 Years in the Central India "TECHMARK CORPORATION" is widely catering to the Varied requirements of our clients by offering wide range of hydraulic hose & fittings, Rubber sheets, Electrical mats and spares for construction machineries

Our range of Exclusively designed hoses is of top quality and is Extensively used in Steel Plants, automobile industry, oil refinery Industry construction industry, Cement industry, Thermal power stations, chemical industry. Aerospace & defence sector.

We are specialized in manufacturing of flexible stainless steel corrugated hose assembly and rubber hose assembly.

We use world class Equipements from UNIFLEX GERMANY & "OP" Italy, like hose crimping machine, cutting machine, etc. Our well efficient staff and skilled technicians help us design flawless range of products for our customers.

The aim of the Company is to offer our customers a reliable and consistent Supplier that continues to perform and help provides solutions that may save them time and money in their business.

LARGE BORE HOSE ASSEMBLIES

In order to meet the growing demand for large bore hose assemblies, we have built a facility to assemble hoses up to 12" diameter.

The workshop is well equipped to execute all kinds of steel fabrication, hydro test, stainless steel corrugated hose assemblies, composite hose assemblies with lathe and milling works to fabricate any non standard hydraulic components which is hard to access in the local market with an expertise team who strive to carry out quality production under strict supervision, which are fit for purpose and fully satisfy customer requirements.

HYDRAULIC HOSES

Hydraulic hoses are used in all hydraulic systems to transmit and hold hydraulic fluids like oils, solvents, grease etc. under low to extremely high pressure.

Hydraulic hoses, along with the other systems on your equipment, need to be checked on a regular basis for abrasion, wear and tear and site damage as a hydraulic hose failure on any piece of equipment can bring it to a standstill in seconds.

A quick visual inspection of the high pressure hoses on your equipment before it is dispatched to a job site or before it is rented out can save you money and time further down the line.

PRODUCTS OVERVIEW
